

MANIFESTO

From family to community. From zero to building.

TRANSPARENCY • ORGANIC GROWTH • LONG TERM

Principles, commitments, and a vision for building PELOCO.

IMPORTANT NOTICE

READ. QUESTION. VERIFY.

Memecoins are highly speculative assets. They may involve low liquidity, high volatility, and risks related to markets, infrastructure, wallets, technology, and platforms.

WE DO NOT PROMISE

- profit
- appreciation
- financial return
- minimum price
- a specific Market Cap
- a specific number of holders
- absence of losses
- absence of manipulation
- absence of technical failures
- absence of risks
- success

We do not promise zero risk. We promise to make the risks visible.

01

THE ORIGIN

PELOCO started with something simple: family. The idea was inspired by the creator's nieces and nephews — something small, personal, and full of meaning.

What began as a tribute became a larger idea: build a community around PELOCO and allow that origin to keep growing over time.

02

WHY PELOCO EXISTS

PELOCO exists to bring a community together around a simple idea: start small, build publicly, and grow organically.

We do not want to create only a token. We want to build an identity, a community, and a story that can evolve over the long term.

03

WHAT WE WANT TO BUILD

We want a project that anyone can follow, verify, and understand.

- transparency
- organic growth
- building in public
- responsibility for published information
- freedom for individual decisions
- long-term continuity

We do not want to appear bigger than we are. We want to build until we truly become bigger.

04

OUR LONG-TERM COMMITMENT

PELOCO is not being built to disappear. The intention is to keep building, grow with the community, and seek relevance over time.

We cannot guarantee the future. We can show, through execution and track record, that we are building toward it.

05

PROJECT INDEPENDENCE

PELOCO is not being built with the objective of being sold or having its control transferred to a company or third party.

The intention is to remain independent. Growing does not mean selling; it means building more.

06

ORGANIC GROWTH

We do not want to buy a community, manufacture activity, or create an artificial appearance of growth.

- no buying holders
- no bots to manufacture activity
- no artificial volume or engagement
- no fake communities
- no paid support presented as organic
- no artificial hype presented as real growth

We prefer a small, real community to a large, artificial one.

07

THE COMMUNITY

The community does not belong to the creator. Everyone is free to buy, sell, hold, trade, follow, or simply not participate.

No one should buy PELOCO because of pressure or blind trust. Everyone should analyze the available information and make their own decision.

08

THE CREATOR AND THEIR HOLDINGS

The creator holds PELOCO across three declared wallets under their control. Because balances change, the current aggregate share is not fixed in this document; it must be checked in the dated on-chain snapshot on the Transparency page.

Declared wallets:

- FG7w73eqj4VaB4Yxj8KmBrUuSin4jv9vvhxhmeqdaFZj2
- BGAmHnySzhRd25ikw7Xpgf2P3DJuHJhaU79tuucgkTmG
- 2BvMhRQS3bghmgJav8sbnGXfh1UqcKwrJPTPAaRSHrEk

The declared intention is to hold the position long term and keep it below 5% of the Total Supply. The 4.8% to 4.9% target and the 2-year lock are plans, not implemented conditions.

The lock mechanism must be publicly disclosed and verifiable before implementation.

09

CREATOR FEES AND REINVESTMENT

The intention is for Creator Fees to support the creator's work instead of selling PELOCO holdings.

When financially possible, resources may be reinvested in development, tools, infrastructure, marketing, content, operations, and business structure. Material changes must be explained publicly.

10

PUBLIC RESERVE

The Public Reserve is a planned structure intended to strengthen the project over the long term. It has not yet been implemented.

The intention is to keep it below 6% of the Total Supply and separate from personal wallets. Once implemented, it must be publicly identified, verifiable, and accompanied by explanations of purpose, amount, and destination.

11

TRANSPARENCY AND VERIFIABILITY

Transparency is not only saying what we are doing; it is allowing other people to verify it.

Whenever applicable, we want to make holdings, creator position, liquidity, relevant transactions, the Public Reserve, decisions, updates, and the building history public.

We do not want people to have to believe. We want them to be able to verify.

12

FACT, INDICATION, AND INTERPRETATION

All information about PELOCO should follow a simple distinction: FACT → INDICATION → INTERPRETATION.

Expectation is not certainty. Possibility is not a promise. Opinion is not fact.

13

HOW TO READ THIS MANIFESTO

This document distinguishes what exists today, what is being built, and what is planned for the future. An intention is not an implementation. A goal is not a forecast. An ambition is not a guarantee.

14

WHAT EXISTS TODAY

Existing today:

- Total Supply of 1,000,000,000 PELOCO
- Solana network
- an identifiable on-chain token
- public presence and an initial community
- three declared creator wallets

The project is still small. We do not hide that.

15

WHAT IS BEING BUILT

We are progressively building identity, community, public presence, transparency, documentation, development history, and a public tracking structure.

PELOCO's credibility must be built through execution and track record.

16

WHAT IS PLANNED

Planned — not yet implemented:

- aggregate creator holdings below 5%
- a 4.8% to 4.9% target
- a 2-year lock once that position is reached
- a Public Reserve below 6%
- reinvestment in strengthening the project
- public tracking mechanisms

Plans may change. Material changes must be communicated publicly.

17

OUR GROWTH VISION

Targets of 1,000 holders in Year 1, 5,000 in Year 2, and 12,000 in Year 3 are aspirational goals — not forecasts or guarantees.

We may reach them earlier, later, or not at all. Holders are only one growth indicator and should be read together with participation and real activity.

18

OUR AMBITION

Our ambition is to make PELOCO a recognized memecoin. The BRL 90 billion Market Cap reference is an aspirational goal.

It is not a price forecast, a promise of appreciation, or a guarantee of return.

19 IF PELOCO GROWS

If PELOCO grows, we want the structure to grow with it: more community should mean more responsibility; more resources, more transparency; more visibility, more care.

We do not only want to become bigger. We want to become more solid as we grow.

20 WHAT WE DO NOT PROMISE

We do not promise profit, appreciation, financial return, a minimum price, a specific Market Cap, a specific holder count, protection from losses, manipulation, technical failures, other risks, or guaranteed success.

Memecoins are highly speculative. We do not promise zero risk; we promise to make the risks visible.

21 YOU DO NOT NEED TO TRUST BLINDLY

Read. Question. Verify. Observe. Compare. Follow the track record. Make your own decision.

Do not trust blindly. Verify.

22

OUR COMMITMENT

Our commitment is to build publicly, act with transparency, grow organically, and respect the community's freedom.

We will not manufacture an appearance of success, hide risks, or present plans as facts. We will keep working to turn a small idea into something larger.

SUMMARY OF KEY COMMITMENTS

The statuses below distinguish present facts from plans, intentions, and aspirational goals.

COMMITMENT	NUMBER / DIRECTION	STATUS
Total Supply	1 billion PELOCO	Existing
Creator wallets	3 declared	Existing
Aggregate position	See current snapshot	Dynamic data
Intended creator limit	Below 5%	Planned
Holdings target	4.8% to 4.9%	Planned
Position lock	2 years	Planned
Public Reserve	Below 6%	Planned
Holders - Year 1	1,000	Aspirational goal
Holders - Year 2	5,000	Aspirational goal
Holders - Year 3	12,000	Aspirational goal
Market Cap	BRL 90 billion	Aspirational goal
Project sale	Not an objective	Intention
Organic growth	No fixed number	Principle

23 • SUMMARY OF KEY COMMITMENTS

The table on this page consolidates commitments, directions, and statuses. It is part of this section and should be read together with the document's transparency notes.

24 • THE RULE

We want every commitment to follow a simple logic: RULE → NUMBER → MECHANISM → PROOF.

If there is a rule, we want to explain it. If there is a number, show it. If there is a mechanism, define it. If there is an important claim, allow it to be verified.

25 • CONCLUSION

PELOCO started small. We do not hide that. We do not know exactly how far we can go, but we know how we want to build.

We do not want to disappear, build to sell, buy growth, manufacture a community, or promise what we cannot guarantee.

We want to build, grow, reinvest, structure, and continue.

From family to community. From zero to building. PELOCO.
