

PELOCO • MANIFESTO

MANIFESTO

From Family to Community.
From Zero to Building.

TRANSPARENCY • ORGANIC GROWTH • LONG TERM

A living document of principles, commitments, and vision.

IMPORTANT NOTICE

Read. Question. Verify.

Memecoins are highly speculative assets and may involve low liquidity, high volatility, and market, infrastructure, wallet, technology, and platform risks. PELOCO does not promise profit, appreciation, financial returns, a minimum price, or success.

We do not promise zero risk. We promise to make the risks visible.

COMMITMENT	NUMBER	STATUS
Supply	1 billion	Existing
Creator holdings	~0.96%	Current
Intended limit	< 5%	Planned
Holdings target	4.8% - 4.9%	Planned
Position lock	2 years	Planned
Public Reserve	< 6%	Planned

01 • PRINCIPLE

THE ORIGIN

PELOCO started with something simple: family. The idea was born inspired by my nieces and nephews. It was something small, personal, and full of meaning. What began as a tribute to them eventually became a bigger idea: building a community around PELOCO. Today, the goal is to turn that origin into something that can continue to grow over time. From Family to Community.

02 • PRINCIPLE

WHY PELOCO EXISTS

PELOCO exists to build a community around a simple idea: start small, build publicly, and grow organically. We do not want to create just a token. We want to build an identity, a community, and a story that can continue evolving over time.

03 • PRINCIPLE

WHAT WE WANT TO BUILD

We want to build a project that anyone can follow, verify, and understand. This means:

- transparency;
- organic growth;
- public building;
- responsibility for the information disclosed;
- freedom for each person to make their own decisions;
- long-term continuity.

We do not want to appear bigger than we are. We want to build until we truly become bigger.

04 • PRINCIPLE

OUR LONG-TERM COMMITMENT

PELOCO is not being built to disappear. Our intention is to keep building the project, grow together with the community, and seek a relevant position in the market over time. We cannot guarantee PELOCO's future. We can show that we are building toward it. The long term will be demonstrated mainly by what we do, not just by what we say.

05 • PRINCIPLE

PROJECT INDEPENDENCE

PELOCO is not being built with the goal of being sold or having its control transferred to a company or third party. Our intention is to continue building the project independently. Growing does not mean selling. Growing means building more.

06 • PRINCIPLE

ORGANIC GROWTH

We do not want to buy a community. We do not want to manufacture activity. We do not want to create an artificial appearance of growth. Therefore, we will not use the following as a strategy:

- buying holders;
- bots to manufacture activity;
- artificial volume;
- fake engagement;
- fake communities;
- paid support presented as organic;
- artificial hype presented as real growth.

Growth may be slow. That is okay. We prefer a small, real community to a large, artificial one.

07 • PRINCIPLE

THE COMMUNITY

The community does not belong to the creator. Everyone is free to:

- buy;
- sell;
- hold;
- trade;
- wait;
- follow;
- or simply not participate.

We do not want anyone to buy PELOCO because of pressure or blind trust. We want everyone to be able to analyze the available information and make their own decision.

08 • PRINCIPLE

THE CREATOR AND THEIR HOLDINGS

The creator holds PELOCO across wallets under their control. Currently, this position represents approximately 0.96% of the total supply. Currently, the creator does not intend to sell their PELOCO holdings and intends to hold them long term. Our intention is to keep the creator's position below 5% of the supply. The planned target is to reach approximately 4.8%–4.9%. When this position is reached, the intention is to implement a 2-year lock. The specific lock mechanism has not yet been defined and, before implementation, it must be publicly disclosed and verifiable. The lock is not a guarantee that PELOCO will exist two years from now. It represents a planned commitment by the creator to a long-term position.

09 • PRINCIPLE

CREATOR FEES AND REINVESTMENT

The intention is for Creator Fees to be the main source supporting the creator's work, rather than selling their PELOCO holdings. When financially possible, part of these resources may be reinvested into the project itself. This reinvestment may support, for example:

- development;
- hiring developers;
- tools;
- infrastructure;
- marketing;
- content;
- operations;
- business structure.

Any material change must be explained publicly.

10 • PRINCIPLE

PUBLIC RESERVE

The Public Reserve is a structure planned to strengthen the project over the long term. The intention is for it to remain below 6% of the supply and be separate from the creator's personal wallets. Once implemented, it must have public identification and allow its movements to be tracked and verified. The reserve may be used to strengthen and develop the project. Whenever it is used, the intention is to explain publicly:

- why it was used;
- how much was used;
- where the resources were directed;
- what the objective was.

The Public Reserve has not yet been implemented.

11 • PRINCIPLE

TRANSPARENCY AND VERIFIABILITY

Transparency does not simply mean saying what we are doing. It means allowing other people to verify. We want to make public, whenever applicable:

- holdings distribution;
- creator position;
- liquidity;
- relevant transactions;
- Public Reserve;
- important decisions;
- project updates;
- building history.

The intention is to develop a public tracking structure so that important information does not depend solely on the creator's word. We do not want people to have to believe. We want them to be able to verify.

12 • PRINCIPLE

FACT, INDICATION, AND INTERPRETATION

All information about PELOCO should follow a simple distinction: FACT → INDICATION → INTERPRETATION. A fact should be presented as a fact. An indication should be presented as an indication. An interpretation should be presented as an interpretation. We do not want to turn expectations into certainty. We do not want to turn possibilities into promises. We do not want to turn opinions into facts.

13 • PRINCIPLE

HOW TO READ THIS MANIFESTO

This document distinguishes what: EXISTS TODAY from what is: BEING BUILT and from what is: PLANNED FOR THE FUTURE. An intention should not be presented as something already implemented. A goal should not be presented as a forecast. An ambition should not be presented as a guarantee. This distinction is part of our commitment to transparency.

14 • PRINCIPLE

WHAT EXISTS TODAY

PELOCO has:

- total supply of 1,000,000,000 PELOCO;
- Solana network;
- identifiable on-chain token/contract;
- public presence;
- initial community;
- creator holdings currently at approximately 0.96% of the supply.

The project is still small. We do not hide that.

15 • PRINCIPLE

WHAT IS BEING BUILT

We are progressively building:

- identity;
- comunidade;
- public presence;
- transparency;
- documentation;
- development history;
- a structure for public tracking.

PELOCO's credibility must be built through execution and track record.

16 • PRINCIPLE

WHAT IS PLANNED

Key plans include:

- keep the creator's holdings below 5%;
- target approximately 4.8%–4.9% in creator holdings;
- implement a 2-year lock when that position is reached;
- develop the Public Reserve below 6%;
- reinvest part of available resources into strengthening the project;
- develop public transparency and tracking mechanisms.

Plans may change as the project evolves. When material changes occur, they must be communicated publicly.

17 • PRINCIPLE

OUR GROWTH VISION

We have ambitious goals for community growth. Year 1 1,000 holders Year 2 5,000 holders Year 3 12,000 holders These numbers are aspirational goals, not forecasts or guarantees. We may reach them sooner. We may reach them later. We may not reach these goals. The number of holders will be only one public indicator of community expansion, alongside other signs of real participation and activity.

18 • PRINCIPLE

OUR AMBITION

Our ambition is to make PELOCO one of the largest and most recognized memecoins in the market. As part of this long-term vision, we have set an aspirational target of approximately: R\$90 billion market cap. This number is not a price forecast. It is not a promise of appreciation. It is not a guarantee of returns. It is an aspirational goal that represents the scale of our vision for the project.

19 • PRINCIPLE

IF PELOCO GROWS

If PELOCO grows, we want the structure to grow with it. More community should mean more responsibility. More resources should mean more transparency. More visibility should mean more care. And greater scale should mean more structure. We do not want PELOCO to simply become bigger. We want it to become more solid as it grows.

20 • PRINCIPLE

WHAT WE DO NOT PROMISE

We do not promise:

- profit;
- appreciation;
- financial returns;
- minimum price;
- a specific market cap;
- a specific number of holders;
- absence of losses;
- absence of manipulation;
- absence of technical problems;
- absence of risks;
- success.

Memecoins are highly speculative assets and may involve low liquidity, high volatility, and risks related to the market, infrastructure, wallets, technology, platforms, and other factors. We do not promise zero risk. We promise to make the risks visible.

21 • PRINCIPLE

YOU DO NOT NEED TO TRUST BLINDLY

You do not need to trust PELOCO simply because we are saying something. Read. Question. Verify. Observe. Compare. Follow the track record. And make your own decision. Do not trust blindly. Verify.

22 • PRINCIPLE

OUR COMMITMENT

Our commitment is to build publicly. Build with transparency. Grow organically. Respect the community's freedom. Do not manufacture an appearance of success. Do not hide the risks. Do not present plans as facts. And continue working to turn a small idea into something bigger.

23 • PRINCIPLE

SUMMARY OF KEY COMMITMENTS

The core commitments are consolidated in this document's reference table.

24 • PRINCIPLE

THE RULE

We want every commitment to follow a simple logic: RULE → NUMBER → MECHANISM → PROOF. If there is a rule, we want to explain it. If there is a number, we want to show it. If there is a mechanism, we want to define it. If there is an important claim, we want to allow it to be verified. _____

25 • PRINCIPLE

CONCLUSION

PELOCO started small. We do not hide that. We do not know exactly how far we can go. But we know how we want to build. We do not want to disappear. We do not want to build to sell. We do not want to buy growth. We do not want to manufacture a community. We do not want to promise what we cannot guarantee. We want to build. We want to grow. We want to reinvest. We want to build structure. We want to continue. From Family to Community. Do Zero à Construção. PELOCO.

RULE → NUMBER → MECHANISM → PROOF

We do not promise zero risk. We promise to make the risks visible.
